## Utility Infrastructure Program & Project Support

### HOW WE SUPPORT INFRASTRUCTURE TEAMS

#### **Execution-focused support that fills the gaps.**

CoreLine Utility integrates behind the scenes to support active distribution, transmission, substation, and communications programs. We focus on coordination, documentation, and project control so delivery teams can stay focused on execution.

Our role flexes based on need. We step in when workload, complexity, or schedule pressure exceed internal capacity.

### CORE SERVICES

- Project Management Support
- Estimating & Pre-Construction Support
- Storm Response Coordination
- Construction Coordination
- QA/QC and Documentation Support
- Regulatory Coordination
- Grant Support

### Representative Experience

- Coordination support for multi-million-dollar storm response efforts
- Experience supporting a large-scale wildfire mitigation program with an annual program budget exceeding \$250 million
- Support across multi-region, multi-contractor utility programs

Execution-focused support for cooperatives, municipalities, utilities, and contractors delivering complex power infrastructure work.
